Reaching out to AWS Support

When you are creating an [AWS Support Case](#) to resolve *Technical, Billing and Service Limit Issues*, following the best practices below will assist in a faster turnaround time.

It is important to understand how AWS Support works through Cases and how cases are prioritized.

Business or Production Impact means you are experiencing negative Financial Impact, these cases are categorized as Urgent and Critical.

If you have any questions, reach out to your AWS account team using your team alias email, aws-signet-team@amazon.com

Before Creating an AWS Support Case

Reviewing the following may be useful before moving on to opening a Support Case:

1. [Service Health Dashboard](#)
 - <https://status.aws.amazon.com>
2. [Documentation](#)
 - <https://docs.aws.amazon.com/>
3. [Knowledge Center](#)
 - <https://aws.amazon.com/premiumsupport/knowledge-center/>
4. [Technical FAQs](#)
 - <https://aws.amazon.com/faqs/>
5. [Discussion Forums](#)
 - <https://forums.aws.amazon.com/index.jspa>
6. [Trusted Advisor](#)
 - <https://aws.amazon.com/premiumsupport/technology/trusted-advisor/>
 - <https://console.aws.amazon.com/trustedadvisor/home>

Information Required when opening a Support Case

1. Description of the Issue (include current impact, resource IDs, etc.)
2. Environment – Production/UAT/QA/Development
3. **Contact Information – Phone and Email (Very Important)**
4. Timeline

All of the following information can be helpful to AWS Support engineers attempting to diagnose the issue:

- **A description of your use case.** What is the intended behavior for this resource / application / project?
- **The environment in which you're observing the issue.** Is this your production, staging, development, or test environment? Who is the intended audience for this content / application?
- **Resource IDs of the affected resources.** Include EC2 instance IDs, S3 object and bucket names, CloudFront distribution IDs, API request IDs, etc.
- **Dates / times when you experienced the issue, and how long the issue persisted.** Make sure to include your time zone.
- **Log files from the approximate time the issue occurred.** You can attach these directly to your case.
- **Any error messages you're receiving.**
- **The steps you took, or the steps a Support engineer might take, to reproduce the issue.**
- **For networking and DNS issues, the outputs of traceroute / mtr / telnet / netcat / dig / nslookup commands.**

AWS Enterprise Support Response Times

Severity	First-Response Time	Description / Support Plan
Business-critical system down	15 min	Your business is at risk. Critical functions of your application are unavailable. (Enterprise support plan)
Production system down	1 hr	Your business is significantly impacted. Important functions of your application are unavailable. (Business and Enterprise support plans)
Production system impaired	4 hrs	Important functions of your application are impaired or degraded. (Business and Enterprise support plans)
System impaired	12 hrs	Non-critical functions of your application are behaving abnormally, or you have a time-sensitive development question. (Developer*, Business, and Enterprise support plans)
General guidance	24 hrs	You have a general development question, or you want to request a feature. (Developer*, Business, and Enterprise support plans)

Before Reaching out to AWS TAMs for Escalations

Before considering escalation, the following methods of engaging the Support Teams through the Support Case can be useful:

- ***Note – Phone and Chat requests will get a faster response than email***
 - ***It is still important to give your case appropriate priority even if engaging over email / phone***
- Important – for Critical and Urgent cases – it is recommended that you use the Phone or Chat options
- Have you tried to engage a Support engineer through –Phone?
- Have you tried to engage a Support Engineer through –Chat?
- Have you supplied contact details for Support Engineer to reach out to you on the Case?

Escalation Process

Once a Support Case been opened:

1. Contact your Technical Account Managers for urgent case management
 - TAM - HoeSeong Ha - hoeseong@amazon.com +1.206.565.7230
 - TAM – Ron Senykoff – ronsenyk@amazon.com +1.781.330.0724
2. If you need to reach the TAMs they can be paged in for high-severity / critical situations
 - Email: aws-signet-emergency@amazon.com
3. Escalate to the Enterprise Support Manager
 - ESM Dhan Athukorala – athukora@amazon.com +1.413.547.1868

Top Tip: BEST OPTION for general engagement! Email your Enterprise Account Team alias: aws-signet-team@amazon.com

How to Request an AWS Support Engineer

Important: Support Cases should be opened from the account where the problem is occurring. This proves ownership of the account and allows support to engage with you and share information / details about the account.

In your AWS console navigate to **Support Center** by typing it in the Search bar

1. Create the support case (Account and Billing, or Technical)

Quick solutions

☐ Account and Billing

☒ Technical

Active cases [Create case](#)

No open cases
Choose **View all cases** to see your case history.

2. Select the Service, Category, and Severity

Service
Elastic Compute Cloud (EC2 - Windows)

Category
EBS Volume

Severity [Info](#)
Production system impaired

[Cancel](#) [Next step: Additional information](#)

3. Enter the full case description following the guidelines mentioned above
4. Upload any logs/screenshots/files that will help support troubleshoot your issue
5. Select Next Step: Solve now or contact us

[Next step: Solve now or contact us](#)

6. Select Contact Us, specify the method (Web, Phone, Chat)
 - **Tip: Make sure to enter important email contacts into the email address field.** Otherwise, all communication will go to the main contact email associated with the account.

[Solve now](#) [Contact us](#)

☐ Web
We'll get back to you within 4 hours.

☐ Phone
We'll call you back at your number.

☒ Chat
Chat online with a representative.

Additional contacts - optional [Info](#)
We will copy email notifications for this case to the following email addresses.

Use commas (,) or semicolons (;) to separate email addresses. You can enter up to 10 email addresses (8 remaining) or 254 characters (191 remaining).

[Cancel](#) [Previous](#) [Submit](#)

AWS Service Quotas Requests

Service quota (previously called Service Limits) increases can be requested through the AWS Support Center by choosing Create Case and then choosing Service Limit Increase.

View and manage Service Quotas: <https://www.youtube.com/watch?v=Ddf5WG5IOQo>

Note: Quotas are region specific

Search for Service Quotas in the AWS Console and open the Service Quota Dashboard

Here you can see Quotas for your services and if adjustable, select the service and “Request increase at account level”

Best Practices:

<https://aws.amazon.com/premiumsupport/technology/trusted-advisor/best-practice-checklist/>

Review Current AWS Service Quotas

Service Quotas are now all managed through the Service Quota Dashboard. Same as making a request, Search for Service Quotas in the AWS Console and open the Service Quota Dashboard

Proactively Manage your service quotas

Use the AWS Trusted Advisor Service Limits check to see if the account is approaching any limits.

<https://aws.amazon.com/premiumsupport/technology/trusted-advisor/>

All additional Service Quota investigation and requests for increases are now done through the Service Quota Dashboard

Service Quotas > Dashboard

Service Quotas

- Dashboard
- AWS services
- Quota request history

▼ **Organization**

- Quota request template

Dashboard [Modify dashboard cards](#)

Service	Total quotas
Amazon Athena	29
Amazon Elastic Block Store (Amazon EBS)	41
Amazon Elastic Compute Cloud (Amazon EC2)	189
Amazon Relational Database Service (Amazon RDS)	28
Amazon Virtual Private Cloud (Amazon VPC)	31
AWS CloudFormation	104
AWS Key Management Service (AWS KMS)	55
AWS Lambda	20
